

INFERNO FIRING CONTROL

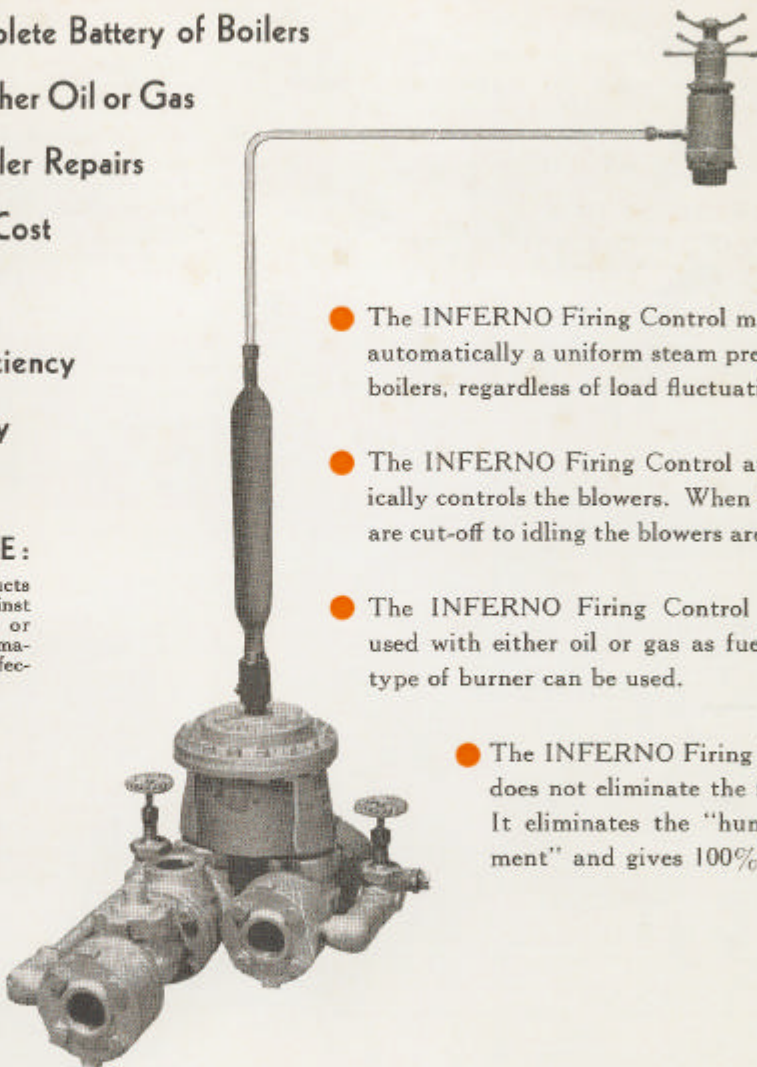

Controls the Fire and Draft and Automatically Maintains Uniform Steam Pressure, Using Either Oil or Gas as Fuel

- Fires a Complete Battery of Boilers
- Fires with Either Oil or Gas
- Reduces Boiler Repairs
- Cuts Labor Cost
- Saves Fuel
- Greater Efficiency
- 100% Safety

GUARANTEE:

All INFERNO Products are guaranteed against defects in material or workmanship. Any material that proves defective will be replaced.

Two Styles!
Flange or Screw
Types in
2" Size.

- The INFERNO Firing Control maintains automatically a uniform steam pressure in boilers, regardless of load fluctuation.
- The INFERNO Firing Control automatically controls the blowers. When the fires are cut-off to idling the blowers are closed.
- The INFERNO Firing Control can be used with either oil or gas as fuel. Any type of burner can be used.
- The INFERNO Firing Control does not eliminate the fireman. It eliminates the "human element" and gives 100% Safety.
